The Company may require an applicant to pay in advance an amount equal to two month's exchange rate. If a deposit is required by the Company, applicable non-recurring charges and service charges (if any) may be required in advance. The terms and conditions specified for such contracts are subject to these General Terms and Conditions and this Services Catalog for the exchange from which service is to be furnished. E. TELEPHONE DIRECTORIES

- Distribution and Publication
 - a. The Company may publish and distribute a directory in electronic or paper format containing the serving exchange listings for each Central Office Access Line without charge. 2. Amount of Deposits

- a. The amount of deposit required shall not be more than the maximum charge for two months local exchange service or as may reasonably be required by the Company in cases involving service for short periods or special occasions. - d. A receipt of deposit will be furnished to each customer from whom a deposit is received. Upon customer request, duplicate receipts will be provided to customers who have lost their receipt if the deposit is substantiated by the Company records.

3. Deposits and Collection Practices

a. The fact that a deposit has been made in no way relieves the applicant or customer from complying with the Company's regulations as to advance payments and the prompt payment of bills; nor constitutes a waiver or modification of the regular practices of the Company providing for the discontinuance of service for non-payment of sums due the Company for services rendered. The Company may discontinue service to any customer failing to pay current bills regardless of the fact that such customer has made a deposit with the Company to secure payment of such bills, or has furnished the Company with a guarantee in writing for such bills.

H. CONSTRUCTION AND INSTALLATION CHARGES

1. General

- a. Lines will be extended in accordance with provisions specified in the Line Extension Section.
- b. Special charges in the form of installation charges, monthly rates or both, are applied in addition to the usual service charge and monthly rates when, because of the sporadic or occasional nature of the service or an unusual investment or expense as for example:
 - 1) The facilities are provided in remote or undeveloped sections.
 - 2) Conditions that require unusual methods of plant construction, installation or maintenance.
 - 3) The customer's location requires the use of costly private right-of-way.
 - 4) The establishment of services which may be of a speculative or temporary nature.
- c. Title to all construction, as specified in H.2. below, provided wholly or partly as a customer's expense is vested in the Company.
- d. "Cost" is labor and materials included loaded overheads and may include a contribution to cover the cost of doing business not explicitly associated with direct cost.

2. Special Type of Construction

a. If a special type of construction is desired by a customer, (e.g., when underground service is desired in places where aerial construction would normally be used) or if unusual requirements of a customer make the cost of an installation higher than it would be if the usual type of construction were used, the customer is required to pay the difference in cost between the special type of construction and the average cost of the usual type of construction.

I. MINIMUM CONTRACT PERIODS

Minimum Contract Period

- a. Except as specified elsewhere in this Services Catalog, the minimum contract period is one month from the date service or additions to service are established and the minimum charge is the authorized rate for one month. For purposes of rate administration each month is considered to have 30 days.
- b. The Company may require a contract period longer than one month at the same location for unusual construction necessary to meet special demands, and involving extra costs (see Special Type Construction).

J. DISCONNECTION OR REFUSAL OF SERVICE (Continued)

- 2. By the Company After Prior Written Notice (Continued)
 - b. Despite the prior written notice provisions as contained in these rules, disconnection may take place prior to the expiration of the notice period if the Telephone Company determines, from verifiable data, that usage during the notice period is so abnormally high that a risk of irrevocable revenue loss is created.
 - c. Only one written notice will be provided to the customer if multiple violations occur.
 - d. The notice of pending disconnection required by these rules shall be a written notice setting forth all reasons for the notice, and the final date by which the account is to be settled or specific action taken. J. DISCONNECTION OR REFUSAL OF SERVICE (Continued)

4. Emergency Medical Conditions

Disconnection of a residential customer shall be postponed 30 days if an existing medical emergency of the customer, a member of the customer's family, or any permanent resident of the premises where service is rendered would present an especial danger to the health of any permanent resident of the premises. Indicators of an especial danger to health include, but are not limited to: age; infirmity; mental incapacitation; serious illness; physical disability, including blindness and limited mobility; and any other factual circumstance which may indicate a severe or hazardous health situation. The telephone utility may require written verification of the especial danger to health by a physician or a public health official, including the name of the person endangered, and a statement that the person is a resident of the premises in question. Initial verification may be by telephone, but the telephone utility may require a written verification within 5 days of the verification of the especial health danger by the physician or a public health official, including the name of the person endangered and a statement that the person is a resident of the premises in question. If the service has been disconnected within 14 days prior to verification of illness for a qualifying resident, service shall be restored to that residence if a proper verification is thereafter made in accordance with the foregoing provisions. If the customer does not make payment during the 30-day period, the service is then subject to disconnection.

5. At Customer's Request

- a. Contracts for service may be terminated prior to the expiration of the contract period provided advance notice is given to the Company and upon agreement to pay all charges due for the service furnished, plus any termination charges which might be applicable.
- b. Where a contract for service with a one-month minimum period is canceled before establishment of the service is completed, a charge not to exceed the service charge specified, is applied if all or a portion of the facilities have been installed.
- c. No minimum or termination charge will apply (unless otherwise stated specifically in this Services Catalog) where a new customer takes over the service of the former customer, provided the service is to be furnished at the same location without interruption and that the new customer assumes all unpaid charges on the original contract. Minimum and termination charges will apply for any service furnished under the original contract which is not retained by the new customer.
- d. No minimum or termination charge will apply in the event the service is terminated because of condemnation, destruction, or damage to property by fire or other cause, beyond the control of the customer.

C. CONDITIONS

- 1. Route and type of facilities
 - a. The Company shall determine the route and type of construction which will be used in the extension of its facilities within an exchange. All such line extensions shall be owned and maintained by the Company.
 - b. The Company will be responsible for the route of the proposed line extension facilities upon which costs will be developed. Such routes will include the last pole or cable distribution box on public or private property but will exclude the drop wire (maximum of 300') for the building in which the telephone service is to be located.
 - c. Any difference in costs between the type of construction proposed by the Company for use on a line extension and the type of construction requested by the customer will be charged at actual cost for the difference. (See Part II, Special Type of Construction.)
 - d. When two (2) or more applicants mutually agree they may be considered as a "group." Line extension charges will be established in order to determine the amount of construction which needs to be provided. Line extension charges computed for the total extension, less allowable costs, may be proportionately divided among the applicant making up the "group."
- 2. Obligation of the Company
 - a. The Company's obligation to provide service through line extensions is solely dependent upon its ability to secure, retain, and maintain suitable rights-of-way without unreasonable expense.
 - b. The Company will survey all prospective customers who could receive service from each proposed line extension project prior to its construction.
- 3. Payment of charges applicable to line extensions shall be paid in advance.
- 4. Applicants requesting service which can be provided from a previously established line extension project:
 - a. Within 12 months from the time service was initially provided by means of such line extensions, initial charges will be recomputed by the Company and the applicant will pay a proportionate share of such charges as if they were one of the initial applicants and appropriate refunds will be made to the original customer(s).
 - b. After 12 months from the time service was initially provided, such applicant(s) will be responsible for the charges and conditions applicable to the establishment of line extension facilities required to serve them alone.
- 5. Except as provided elsewhere in this Services Catalog, refunds of line extension charges will not be paid by the Company.

C. CONDITIONS (Continued)

- 6. Supersedure of service provided from a line extension and any adjustment in an amount paid by a customer discontinuing such service will be a matter of negotiation between the disconnecting customer, who has obligated himself for the line extension charge and the superseding applicant.
- 7. The Company will have the option to specify the type of construction to be used when line extensions are requested for service into real estate subdivisions or mobile home parks. Any difference in costs of types of plant facilities used by the Company or requested by the subdivider will be negotiated between the parties.
- 8. When the line extension proposed contains growth potential to provide for anticipated future service demands, the proposed customer(s) will only be obligated for that portion of such line extension costs as would be necessary to serve the new customer alone. It will be to that segregated amount that the Formula for average Outside Plant costs will be applied.
- 9. Line extensions of a temporary or speculative nature
 - a. Line extension of the Company's facilities may be made to provide service of a temporary or speculative nature. An applicant whose service is considered speculative or temporary in nature will be charged the total actual costs of construction and estimated costs of removal, less salvage value, for the material used to establish the service.
 - If after a 12-month period the temporary or speculative project is considered by the Company to be a permanent service, a refund may be made to the customer for the difference between costs paid and the charges which would have been computed for a regular line extension.
