

From pre-project consultations to OSP projects to troubleshooting your existing networks, Partner Pro Tech Services has the knowledge, experience and equipment to make your communication projects a success, keeping you on time and within budget.

Unlike other contractors, we don't simply contract out work: we're a service provider just like you. As the technical division of Partner Communications Cooperative, we understand the unique pressures and considerations facing you - because we face those same issues as we provide Internet, Phone and Cable services for our six member communities.

To learn more about the difference our service-oriented experience makes, contact us today!

## Our Services

### Pre-Project Consultation

Successful, cost-effective projects take planning. Our experienced team of experts can complete site surveys & estimates to help minimize surprises and help guide you to where you need to go.

### OSP (Outside Cable Plant)

We can do it all - from hanging to burying and from testing to fusion fiber splicing. No more dealing with multiple vendors! If you already work with vendors, we also provide vendor-neutral consulting to help give your project,

the direction it needs regardless of which companies you use.

### Fiber Optics/ Fusion Splicing

From one line to one thousand lines, we are fiber optic experts! In addition to installation, We can repair inside and outside fiber much more affordably with an in-line fusion splice versus re-installing a whole new fiber run. We offer a variety of fiber optic solutions:

- Maintenance for fiber cabling
- Fiber optic cable termination
- Fiber optic cable splicing

- Fiber optic installation
- Aerial cable placement

### Structured Cabling

Residential or business, new or existing construction, our expert team has decades of experience. You'll never hear "it can't be done" from our knowledgeable and creative staff. We can even organize and simplify complicated systems so future changes and upgrades are more easily accomplished.

### Troubleshooting

You can't afford to disappoint your

customers - so call in the experts. We have the specialized equipment and knowledge to troubleshoot wireless networks, fiber networks and nearly any other system you have installed.

### MAC (Move-Add Changes)

Whether it's a new user in your secure system, equipment upgrades or extending new services from a demarc to your network closet, we make MAC a seamless and hassle-free process that doesn't complicate your workflow.
